

A complex network graph visualization. It features a large number of green circular nodes connected by a dense web of thin gray lines (edges). The nodes are distributed across the frame, with a high concentration in the center-left area where the edges are most numerous, creating a dense, almost solid-looking cluster. From this central hub, many edges radiate outwards to more isolated nodes, particularly towards the right and bottom-right edges of the image. The overall shape is roughly circular but with many protrusions and gaps, suggesting a complex, possibly hierarchical or modular, underlying structure. The background is plain white, making the green nodes and gray edges stand out clearly.
